

# How to Make Bamboo Wind Chimes

**1. Colour and decorate your bamboo pieces.**

**2. Tie a knot in the end of your string. You may need to tie another knot on top of the first one so the bamboo piece doesn't fall off!**

**3. Thread your bamboo piece onto the string.**

**4. Choose two beads and thread them onto the string as well.**

**5. Repeat steps 2, 3 and 4 so all your bamboo pieces and beads are threaded onto string.**

**6. Tie the end of each string (the end with no knot) onto your stick. Use a reef knot if you can!**

**7. Take the last, long piece of string and tie one end to the end of your stick. Take the other end of the string and tie that to the opposite end of your stick. Now you can hang your bamboo wind chimes up!**
