

How to Make a Candy Cane

You will need:

**1 pipe cleaner and 21 pony beads in red and white
(or whatever colours you like!)**

- 1. Take your pipe cleaner and fold it in half**

- 2. Twist the pipe cleaner halves together**

- 3. Turn up the end to make a small hook**

- 4. Slide on your first bead, making sure the hook
tucks over to keep the bead from falling off**

5. Add the rest of the beads to fill the candy cane

6. Once all 21 beads are on, tuck the other end of the pipe cleaner over the last bead to keep them on

7. Gently bend the strand to make it into a candy cane

Try different colour combinations for your candy canes, and have fun making!
